300	150	70	294	264	13,99
318	150	70	294	264	16,29

CUSTOMER SERVICE

AXJO PLASTIC® offer to assist the customer in **all aspects** of the project. This includes adapting machines, customizing reel/spool and axis for specific demands etc. We are also able to connect you to a preferred box producer, our cooperative partner Smurfit Kappa Lagamill AB.

MATERIAL

The compound is a **polypropylene** based material which has a minimum impact on the **environment**.

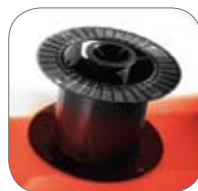

Our customers are widely spread all over the world, therefore the compound is designed to handle temperatures from **-40 to +70 °C**. It is a resistant against **UV-exposure** up to 10 years. No risk for **vermin** or similar.

RECYCLING

The material of both reel/spool, axis and box are classified as **combustible** and thereby no separation when disposing is required.

AXIS SOLUTIONS

The customer can choose the axis solution that fit their product best.

Bore axis, the reel/spool spins free inside the box.

Support flange, allows a lighter and more price effective box.

Box sliding solution, with thicker flanges axis can be eliminated.

It is also possible to customize the axis solution for specific products.
